## Simple \& Compound interest

i. A building society offers a saving account earning $\mathbf{2 . 6 \%}$ simple interest. If $£ 1200$ is saved in the account for 2 years, how much interest would be earned?
ii. Jason invests $£ 6,400$ in a savings account. He gets $1.25 \%$ per annum compound interest.
How much money will Jason have in his saving account at the end of 3 years?
iii. Pauline brought a new car for $£ 9000$. The value of the car depreciates $18 \%$ each year.
What will be the value of the car after 5 years?
iv. Viv wants to invest $£ 25 \mathbf{0 0 0}$ for $\mathbf{3}$ years in a bank.

| Personal Bank |  |
| :---: | :---: |
| Compound Interest |  |
| $2 \%$ for each year | Friendly Bank |
| Compound Interest |  |
| $4.3 \%$ for the first year, then |  |
| $0.9 \%$ for each extra year |  |$|$

At the end of 3 years, Viv wants to have as much money as possible. Which bank should she invest her $£ 25000$ in?
