## Advanced Averages

i. A pupil at a school conducts a survey, collecting the ages of 20 people on a bus. The results are given below:

| Age     | Frequency $(f)$ | $Midpoint\ (m)$ | $f \times m$ |
|---------|-----------------|-----------------|--------------|
| 0 - 9   | 2               |                 |              |
| 10 - 19 | 5               |                 |              |
| 20 - 29 | 3               |                 |              |
| 30 - 39 | 3               |                 |              |
| 40 - 49 | 4               |                 |              |
| 50 - 59 | 3               |                 |              |
| Total   |                 | -               |              |

- Complete the table by filling in the two missing columns and the totals row.
- What is the mean age of the people on the bus?
- What is the modal group of ages?
- ii. The table below shows the results of a science experiment, grouped by temperature:

| Temperature     | Frequency $(f)$ | $Midpoint\ (m)$ | $f \times m$ |
|-----------------|-----------------|-----------------|--------------|
| $0 \le x < 5$   | 2               |                 |              |
| $5 \le x < 10$  | 6               |                 |              |
| $10 \le x < 15$ | 8               |                 |              |
| $15 \le x < 20$ | 4               |                 |              |
| Total           |                 | -               |              |

- Complete the table by filling in the two missing columns and the totals row.
- What is the mean temperature in the results?
- What is the modal group of temperatures?

## iii. The table below shows the number of visitors to a museum over a year:

| Month    | Jan | Feb | Mar | Apr | May  | Jun  | Jul  | Aug  | Sep  | Oct  | Nov | Dec |
|----------|-----|-----|-----|-----|------|------|------|------|------|------|-----|-----|
| Visitors | 650 | 800 | 775 | 950 | 1050 | 1125 | 1250 | 1450 | 1375 | 1100 | 950 | 775 |

Using the data above, calculate a 6-month moving average of the number of visitors to the museum.
